Thank you for taking time to
read this and bless you,

Rudie was a hard worker. He was so grateful to
work for Alford's Sleep mill. In 1989

He was found in his own vomit in a deep coma
sitting by the company machine. After he was
air lifted to Evansville for brain surgery
to save his life and many months in Rehab at
Rehab center. He regained his memory and remembered

He was working around trying to save his machine.

→ He was a pumpier. The machine was sinking in a
Muddy Slush Pond, as he worked his feet started to

Muddy Slush Pond, as he knew it was something really bad
Pained, Pain so Bad he knew it was pulling the tree up.

→ He tied the machine to a tree. But was pulling the tree up.
He worked to tie it to a bigger tree. A said. Just keep on.
He worked his last work. Before he was
found. M.H.S.

He was under ground in 194. Before
He was so grateful to Be
out Door's, He was happy.

He was a pumper, did all 3
shifts on the day shift, He
was found by his machine in
a coma in his own vomit.
Was trying to save his machine from
sinking into a slush pond. He
TOLD US later.
