

Dear Shelley C. Chapman

I am writing this letter to let you know, that I have a lot of medical problems, and I need to keep my health insurance.

Peabody promised us, that we will keep our insurance, and pension. We need to fight for it, because all we know is coal mining, I am retired now, can't work, and if they take our health insurance, I don't know what I will do. Because I relied on it, West Virginia relies on coal mining, because that's all we know.
