

Honorable Shelley C. Chapman

10-8-2012

We are both 65 years old, at the age where we should be able to relax and enjoy retirement. Our health care insurance is the most important part of our retirement plan. It certainly isn't the amount of our pension check. The mines in our area were all shut down by Peabody before we could get a decent amount, then Peabody opened them back up non-union.

This is just to get them (Peabody) out of letting us keep our insurance. We know many widows who depend on it. There are so few of us left why can't they just keep their word and do what they are suppose to do. Mike is diabetic so we really need our insurance, as do many others.

Thank you for taking time to read this.
