

To whom it may concern;

I Am Theodore Floyd, 88 years old, I have had a heart attack, three stints put in and am on oxygen for my breathing.

I worked 44 years in the coal mines 24 years in the Union and 20 under the company. I have a medical card that I use each visit to the Dr. for my breathing, heart, and other problems that I have. Without this insurance card, I could not pay the Dr. bills or the hospital bills or the medicine that is prescribed to me.

Please send this back to Charleston, W.V., or please side with us that have given all these years of service to the coal mines owned by Patriot Coal. Please let us keep our pensions and medical cards so we can live from day to day without worrying about how we will pay for Dr. bills that I have.

Thank you
Theodore Floyd
