

Dear Judge Chapman,

I am a 62 year old disabled miner. I have Black Lung, emphysema, and they also think I have lung cancer. I am on oxygen 24/7 and take some very expensive medications. I have worked most of my life for my health care and pension benefits. To take these away from me now would most likely be a death sentence, because I would be unable to pay for any treatments I need.

Please don't let Peabody and Patriot get away with this. I AM begging you.

Respectfully Yours,
Raymond E. Wright
