

To the Honorable Shelley C. Chapman:
We are very concerned about losing
our insurance.

My husband retired in 1994 with the
understanding we would have full coverage.
He retired early because of this.

In 1999 I had breast cancer - with all
the treatments you go through. In 05. I had
Pancreatic cancer (Whipple surgery) followed
by Radiation and 6 mo. of Chem. I still
have problems with my blood - so its an on
going doctor appts - tests etc.

My husband has a history of Kidney Stones.
Plus the fact that we are in our middle 80's
and nothing is easy for us. Can't imagine
what it would be like for us to have to worry
about our medical insurance.

I come from a family of coal miners, so
I know the ups and downs thru the years
here in Southern, Ill.
