

In regards to the importance of my Medical Health Insurance Coverage.

I'm very concerned in the fact that, if, I no longer had this coverage, it would cause a hardship for my family and me. And I could not afford to buy our medications or to see a Physician for these conditions.

I am a 75 year old. Coal Miner of 40 years and I am totally disabeled.

I am in poor health. I have a Cardiovascular Problem with stent, Kidney issues, Perphrial Neuropathy, High Blood Pressure, Gout, Back Injury, and hip issues. I am taking many medications for these problems. Efficient, Crestor, Coated Aspirin, Lyrica, Clonapine, Avodart, Omepazole, Amlodipine, Allopurinol, , B12, D3.

My wife also, has health issues: She takes several medications: Nexium, Premarin, Alaign, Zanaflex, Vytorin, Prozac, Benicar, Hctz, Potassium, Vitamin D3, B12.

With the high cost of living. For me to loose Benefits of my Medical Coverage, it would be impossible for me to pay for these medications. Therefore, causing deteriating health.

I retired under The Rockfeller Bill and was supposed to have a secure medical plan. August 1994.

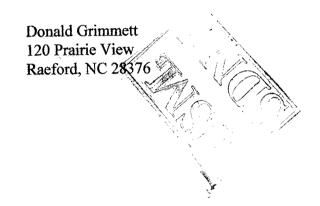

Now, my Medical Coverage is in jeopardy.

New York, New York 10004-1408

Any assistance you could give would be greatly appreciated.

Sincerely

Donald Hrimmett
